

SAFTEE

Safe Action for Transporting Every Employee

Paratech Ambulance Service offers you **SAFTEE**, our Safe Action for Transporting Every Employee program—the safest option for transporting every employee when there is a need for a non-emergency trip to a doctor or clinic appointment.

Skip the taxi, avoid tying up the 911-system, and don't let employees drive themselves to the clinic or hospital. Reduce your liability when these types of transports are required: possible drug violations or worker's compensation injuries. We offer **SAFTEE** for such critical situations.

For only \$150, Paratech Ambulance Service will safely transport the individual to the location of your choice when an employee appears under the influence and you decide to send him or her to a clinic to have a drug test conducted, or if an employee is hurt while on-the-job and he or she must be sent to a clinic or hospital to be evaluated.

Even if your on-site medical staff has already treated the employee and your medical staff deems it appropriate that the employee be transferred to your worker's compensation provider, you can still call us to ensure that the employee is safely transported to the destination of your choice.

Reliable, no-risk employee transport, cost-effectiveness, and liability protection are advantages you receive when you call Paratech Ambulance Service for **SAFTEE**. We specialize in 24-7, year-round, emergent and non-emergent pre-hospital care and transport ranging from Basic Life Support up to Critical Care.

Call the professionals today to set up a contract so that you know your employees will have a safe transport if and when the situation occurs.
